- About radiotherapy in AYA with cancer
- About supportive care of AYA with cancer in the AYA unit in Essen
- Updates on the latest research
- Updates from the AYA work of the international professional societies
- Updates on the projects of the national AYA societies and European NGOs

Strategy

The draft ENTYAC strategy for 2023–26 will be taken from draft to final, after both a pre-meeting consultation and discussion in person during the meeting

About ENTYAC

ENTYAC came into being on January 1st 2011. It arose out of the funded European Union FP7 programme called ENCCA (the European Network for Cancer in Children and Adolescents) which ran from 2011 to 2015 inclusive. Within that network we had run a programme of collaborative research and health service development and the group of centres and specialists who had worked together simply wished to continue to do so.

We lapsed in 2017 because of a lack of ongoing funding, and relaunched in 2019.

We work for our individual members, as a federation of existing societies with a stake in AYA cancer care, and have SIOPE, ESMO, EHA, ESTRO and EONS in our collaboration, alongside service users, charities and national AYA-focused clinical groups.
